

Towards a safer Internet: The European and Cypriot perspective and reality

Ημερίδα για το Ασφαλές Διαδίκτυο

Marios D. Dikaiakos

Department of Computer Science

University of Cyprus

The success of the Internet

- In our days Internet has become the prevalent medium of communication and information exchange, bringing tremendous advantages in all aspects of life.
- The broad use of Internet continues to spread. In 2004:
 - Every second European (49.8% - EU-25) had used the Internet in the last 12 months;
 - Close to 54% of European Internet users linked up to the Internet every day or almost every day.
 - More than 82% connect to the Web at least once a week.

Source: Eurostat, 2004

The success of the Internet

Table 1: Share of individuals who accessed, in the last 3 months, the Internet on average at least once a week, (in %) - 2004

	Retired	Employees	Students	Unemployed
EU-15	10.6	:	68.3	:
CZ	1.3	:	:	:
DK	29.2	77.0	89.4	56.3
DE	18.0	60.5	84.0	41.7
EE	3.3	52.4	88.6	26.7
EL	0.8	25.2	45.7	11.5
ES	3.7	:	:	:
IE	5.8	:	42.2	:
IT	4.3	34.8	61.8	23.7
CY	6.7	31.3	73.0	39.1
LT	0.9	29.8	76.9	6.2
LU	1	:	90.4	:

The use of new media by children will be an important part of their lives - positive, but there are considerable concerns.

Eurostat, 2004

Risks

- Illegal, harmful and unwanted content and conduct on the Internet is a continuing concern.
- Several risks arise from the availability and communication of inappropriate or harmful content:
 - Pornography (adult content, and illegal content including child pornography)
 - Some interactive services, e.g. chat-rooms, which expose children to meeting exploitative, bullying or predatory adults
 - Music & videos with adult content
 - Unsolicited Email (Spam)
 - Games with violent or sexual content
 - Gambling
 - Some premium rate services (090)
- Other issues: privacy, financial pressure...

New challenges arise

- In **quantitative terms** due to the sheer size of the Internet:
 - At present time there are **more than 8 billion Web pages**
 - **"Illegal" content** continues to grow.
- In **qualitative terms** with new platforms and products:
 - the ever-increasing processing power and storage capacity of computers
 - the wider penetration of **broadband**
 - the **convergence of media technologies** (video, audio) with ICT
 - **peer-to-peer file sharing, real-time and mobile** communication enhance the atomised production of content, secrecy assurance, the production and hosting of video-on-demand anywhere.
- **Criminals will use new media for carrying out their activities.**

New challenges arise

- The mobile phone has become an **entertainment instrument** for minors who rarely use it to place traditional phone conversations. It is mainly used to play, take/send pictures, etc.
- **SMS** has proven to be the option mostly used by minors to communicate, creating their own language.
- Minors are becoming important **consumers of products** related to mobile phones (terminals, melodies, screen savers, etc).

Addressing the problem

- There are **no easy solutions** or **quick fixes**.
- **Different players need to be involved**, taking responsibility and creating **synergies** towards a Safer Internet:
 - Parents, Teachers, and the Educational System
 - Internet Service Providers, Content providers, and Telecom. Operators
 - The Police and the judicial system
 - Telecommunication Regulators & Data Protection Authorities
 - The Government and Law makers
 - Media and the press
 - Non-governmental organizations
 - Technology experts and research organizations

The Safer Internet Initiative of the E.U.

- Promoting safe use of the internet and online technologies
- Particularly **for children**
- **Fight against illegal and harmful content** and content unwanted by the end user
 - **Illegal** - non-regulatory approach
 - **Harmful** - cultural differences
 - **Unwanted** - spam
 - **Content** - but also conduct
 - **Internet** - and new technology

Safer Internet Evolution

- Action Plan

- 1999-2002
- *25 M euros*

- Extension

- 2003-2004
- *13.3 M euros*

- Safer Internet Plus

- 2005-2008
- *45 M euros*

- 16 hotlines in 14 countries + INHOPE
- Rating and filtering - 13 projects
- Awareness - 12 projects
- 138 partners from 17 countries

- 20 hotlines + INHOPE + 1 under negotiations
- 19 Awareness nodes + INSAFE and AWAREU + 2 under negotiations
- 1 MEDIA
- 1 QUALAB
- 2 SELFREG under negotiations

Towards a Safer Internet workshop

- Introduction of the Cypriot Hotline **SafeWeb**
 - Mission-Target-Activities and Operations
- Present Local/International activities, aiming at promoting internet safety.
- Trigger a discussion on Internet safety issues among local authorities, organizations, associations, industry.

Workshop schedule

“Towards a Safer Internet The European and Cypriot perspective and reality ”

AGENDA

09:45-09:55 Welcome Address, Prof. Marios D. Dikaiakos, University of Cyprus

09:55-10:00 Welcome Message, Mr. Ioannis Efthimiou , Ministry of Education

Part I “The International Experience”

10:00-10:20 INHOPE Presentation, Ian Brown, INHOPE

10:20-10:40 IWF Overview, Frank Glenn, Internet Watch Foundation

10:40-11:00 The SAFELINE Experience, Stavros Markopoulos, FORTHNET

11:00-11:30 *Coffee Break*

Part II “The Cyprus Perspective”

11:30-12:00 SafeWeb, Michalis Ellinas, University of Cyprus

12:00-12:20 Secondary Education Perspectives, Mr. Tassos Tassou, Ministry of Education

12:20-12:40 An industrial perspective, Mr. George Lakkotrypīs, Microsoft

12:40-12:50 Discussions and Questions

12:50-12:55 Closure of Event

13:00-14:00 Lunch

A few words about us: High-Performance Computing Systems Lab

- Established in 2001-2002.
- Funded by the University of Cyprus, the European Union, and Republic of Cyprus, and the (FP5, FP6, RPF).

HPCL Mission

- Conduct research and promote the scientific and technological knowledge in Internet and World-Wide Web technologies.
- Support University courses in Internet technologies (at an undergraduate and graduate level).
- Supervise undergraduate (B.Sc.) and post-graduate thesis work (M.Sc., Ph.D.).
- Promote applications of Internet and High-Performance Computing and Networking in Cyprus through support and technology-transfer actions.
- Develop, support, and exploit a high-quality research infrastructure.

HPCL Activities
